If your insurance requires a referral from your primary care physician, you must have that referral with you in order to be seen. Otherwise, your appointment will have to be rescheduled.

If you have had tests completed prior to your scheduled appointment (at a hospital or your referring physician office), please make sure we have received the results of your tests prior to your visit.

If you are unable to keep your scheduled appointment, it is very important that you contact our office at least 24 hours in advance so we may adjust our schedule. If you arrive more than 15 minutes late for your appointment, we may have to reschedule your appointment to another day.

On behalf of Dallas Heart & Vascular Consultants, we look forward to meeting you and providing you with excellent cardiology care. If you have any questions, please call us at (214) 942-5511.
